

FACTORY BUILT HOUSING INDUSTRY TRENDS QUICK FACTS

REVISED 2020

FACTORY BUILT HOUSING IN MISSISSIPPI

Today's factory built homes offer you the ability to customize your home to fit your family's lifestyle. You can select a home and choose from a variety of standard features that include vaulted ceilings, spacious master bedrooms with walk-in closets, dressing areas, tiled bathrooms with recessed tubs and whirlpools, and wood-burning fireplaces. You may select optional amenities for your home like custom cabinetry, energy efficient appliances, special window designs, ceramic tile floors, and countertops.

WHAT IS FACTORY BUILT HOUSING?

A manufactured home is constructed of standard building materials built off-site in a factory setting. Manufactured homes are built entirely in the factory under a federal code administered by the U.S. Department of Housing and Urban Development (HUD). Manufactured homes may be single or multi-section and are transported to the site and installed. A modular home is constructed of standard building materials built off-site in a factory setting. Modular homes are built to the state/local building codes of the jurisdiction in which the home is going to be sited. These are the same building codes to which local builders adhere. Once built, the modules are transported to the site and installed.

WHO LIVES IN FACTORY BUILT HOMES?

The quality, affordability and limitless amenities of factory built housing have made it the perfect choice for many Americans. Over 22 million people across the country have decided to make factory built housing their way of life. Factory built homes appeal to a wide range of demographic groups from single adults to seniors to families just starting out.

Many who choose factory built housing discover that the payments are lower than apartment rent, and these homes can more than double their living space.

Manufactured housing retailers offer open floor plans and hundreds of design options to meet the needs of growing families. Some communities offering amenities like playgrounds, pools and planned activities make great neighborhoods to raise children. Seniors can retire comfortable and affordable in factory built homes.

The average cost of construction for a single-section manufactured home is **\$45.4** per square foot and multi-section **\$54.6** per square foot as compared to approximately **\$107.18** per square foot for comparable site-built homes. Modular homes typically cost **10-25%** less than site built homes for same square footage. (MHI)
